REV.	DESCRIPTION	DATE
A		04-2014

Function	Qi standard embedded TX module, easy to be integrated into a variety of work surfaces, including furnitures and public facilities, able to provide wireless power for any Qi-enabled smartphones, tablet, handheld gaming consoles and other portable devices, an eye-catching ring lighting design to guide the user for correct placement of their portable devices.
Specification	Dimensions：Φ92.2 * 22mm
	Net Weight：137± 5g
Technical parameter	Input voltage：DC19V
	Input current：≤500mA
	Output power：≥5W wireless power
	Reaction temperature：-10 ～ 40℃
	Working heat up range：≤20℃ (ambient temperature ≤25℃)
	Working ambient humidity：≤80%
	working life：＞ 4000 times
Colour	White (Customized colour are available)
Features	Stylish design, easy to install, ideal integration for furnitures or pucblic facilities.
	Completely compliance with Qi standard, able to provide wireless power for any Qi-enabled smartphones, tablet, handheld gaming consoles and other portable devices.
	It adopts intelligent identification system while its transmitter and receiver unit adopts UART (Universal asynchronous receiver/ transmitter) encrypted transmission control signal which is stipulated by WPC.
	Eye-catching ring lighting design to guide the user for correct placement of their portable devices.
	LED indicates 3 working status: ① Light off: Power/Qi device diconnected. ② Blue light always ON: Device is charging and working normally. ③ Red light always ON: Abnormal working.
Standard content	Embedded Tx Module
