

## Keystone IR Receiver Adapter (12VDC)

Our IR Keystone Type IR Receiver snaps into a keystone-style wall plate and receives IR signals from a remote control. Its usefulness could be found when the home entertainment devices are established beyond the range of the remote control. The dual band keystone type IR receiver is another perfect addition for in-wall installation. This Keystone Type has a jack for 3.5mm for the IR Receiver to be inserted.

**(Note: The remote control should not exceed 5 meters)**

### Features

- Keystone Type
- Dimension: 42mm (L) x 19.3mm (W) x 24.3mm (H)
- 3.5mm Female to Terminal Type
- 12VDC
- Connect an IR Receiver with a 3.5mm connector for an easy and clean IR home theater setup.
