

IR Connecting Block with LED Power Indicator

Our IR connecting blocks are essential to create the most convenient home theatre system. This particular connecting block has six IR emitter ports allowing up to the control of 12 A/V devices, a port for the IR receiver, and LED indicators for power and status. The block itself is designed in a compact shape that it can be mounted anywhere without drawing conspicuous attention. With its use, the customers will notice an unparalleled experience at the comfort of their own homes.
