

## IR Connecting Block Wall Plate

Our IR connecting blocks are essential to create the most convenient home theatre system. This particular connecting block has three IR emitter ports allowing up to the control of 3 A/V devices, a port for the IR receiver, and LED indicators for power and status. Furthermore, this connecting block comes in the form of a wall plate. The block wall plate reduces the number of wires visible to the viewing members, which in respect will provide an aesthetic setup. More importantly, with its use, the customers will notice an unparalleled experience at the comfort of their own homes.
